

Dr. med.
NICOS
DANOS
- internist -

DR. NICOS DANOS
SPECIALIST INTERNIST
GHS DOCTOR
DOCTOR OF MEDICINE
of the UNIVERSITY OF ERLANGEN (W. GERMANY)

My name is Nicos Danos and I come from Ypsonas of Limassol. As from 1984 I maintain a general diagnostic practice in Nicosia. Being a pioneer in abdomen and pelvis ultrasound, gastroscopy, sigmoidoscopy, cardiograms, stress tests and spirometry, I was the first to bring diagnostic equipment of the latest technology from my practice in Germany to Cyprus.

As from 2019 I have been operating as a personal medical doctor for adults with the Cyprus General Health System (GHS). I also act as medical consultant to the GHS on a pro bono basis.

I take on the preparation of medical opinions for forensic matters, such as traffic accidents, medical negligence cases and other relevant matters.

From 2001 to 2019 I was a medical officer with the Electricity Authority of Cyprus. My duties included the conduct of competence examinations for the hiring of employees and the organization of medical consultations for the examination of matters of medical work.

A few words about me ...

In 1964 I graduated from the Lanition Gymnasium of Limassol and in the same year I went to West Germany. I spent a year learning the German language at Rothenburg and preparing for my admission to the University of Erlangen-Nuremberg.

After eleven semesters at the above university, I received my medicine degree with honours on 24.01.1973. I note that I had received a scholarship from the German state for my studies.

Within the same year I also concluded my doctoral thesis, the study object of which were cancer indicators prior and following the removal of cancer in patients, and I received the title of Dr med.

Immediately afterwards and within one year, I concluded my internship at a state hospital in Munchberg and I received the licence from the Ministry for the Interior of the state of Bavaria to exercise medicine in Germany.

Thereafter, I began my specialty in Internal Medicine at the state hospital of Weiden/Opf in Bavaria and, with the conclusion of my specialty, I received the officially recognized title of Dr med. Internist, Doctor of Internal Medicine, by the Bavarian state medical authority on 07.05.1980.

From the middle of 1980 until the middle of 1984, I had my own practice in Weiden/Opf and exercised medicine as a specialist general practitioner of the General System of Health in West Germany. In mid-1984 I transferred the practice to two German colleagues and returned to Cyprus.

Since then and until the middle of 1995 I collaborated with the Pedieos IVF Center, where I monitored the development of ova through ultrasound, assisting Dr. Krinos Trokkoudes in their collection. In 1992, the oldest woman, and specifically at 57 years old, became pregnant with the help of ultrasound for the first time worldwide; an achievement that was published in the Guinness Book of World Records.

I am married and have four wonderful children.

I am a nature lover and I do farming and vine dressing. From my father I have inherited a licence to distill zivania for the continuation of the tradition of my ancestors from Ypsonas and Lofou of Limassol.

I like painting, whereby I have had two large exhibitions in Germany.

The critical commentary of current events through letters published in the local press is also an interest of mine.
